

Session 1

Q1. Write a short paragraph in your own words defining what a 'program' is and give one real-life example from any app you use daily (like Instagram, Zomato, or Paytm).

Ans: A **program** is a set of instructions written in a programming language that tells a computer what to do. It helps perform specific tasks automatically and solves problems efficiently. For example, when I use **Instagram**, the program allows me to log in, view posts, like photos, send messages, and watch reels based on my interests.

Q2. List three popular programming languages you have heard of, and for each, mention whether it is usually compiled, interpreted, or can be both.

Ans: 1. **C** – Usually **Compiled**.

2. **Python** – Usually **Interpreted**.

3. **Java** – **Both** (compiled into bytecode and then interpreted/JIT-compiled by the Java Virtual Machine).

Q3. Draw a flowchart (on paper or using any online tool) for the process of booking a movie ticket on BookMyShow, starting from opening the app to receiving the booking confirmation.

Ans:

Q4. Write down the steps (as an algorithm, using simple numbered instructions) for ordering food on Swiggy — from opening the app to completing payment.

Ans:

1. Start.
2. Open the **Swiggy** app.
3. Log in to your account (if required).
4. Enter or confirm your delivery location.
5. Search for a restaurant or food item.
6. Select the restaurant.
7. Choose the food items you want to order.
8. Add the selected items to the cart.
9. Review your order and click **Proceed to Checkout**.
10. Select or confirm the delivery address.
11. Choose a payment method (UPI, Card, Net Banking, or Cash on Delivery).
12. Complete the payment.
13. Receive the order confirmation.
14. End.
